

List of countries by GDP (nominal)

Gross domestic product (GDP) is the market value of all final goods and services from a nation in a given year.^[2] Countries are sorted by nominal GDP estimates from financial and statistical institutions, which are calculated at market or government official exchange rates. Nominal GDP does not take into account differences in the cost of living in different countries, and the results can vary greatly from one year to another based on fluctuations in the exchange rates of the country's currency.^[3] Such fluctuations may change a country's ranking from one year to the next, even though they often make little or no difference in the standard of living of its population.^[4]

Comparisons of national wealth are also frequently made based on purchasing power parity (PPP), to adjust for differences in the cost of living in different countries. Other metrics, nominal GDP per capita and a corresponding GDP (PPP) per capita are used for comparing national standard of living. On the whole, PPP per capita figures are less spread than nominal GDP per capita figures.^[5]

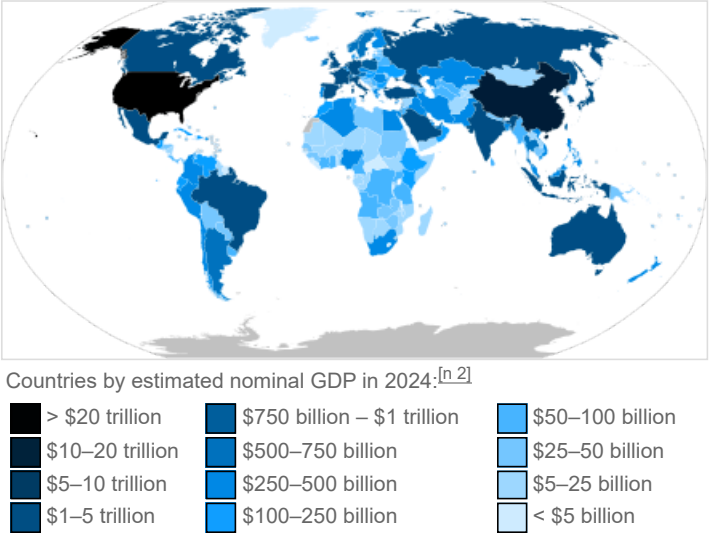

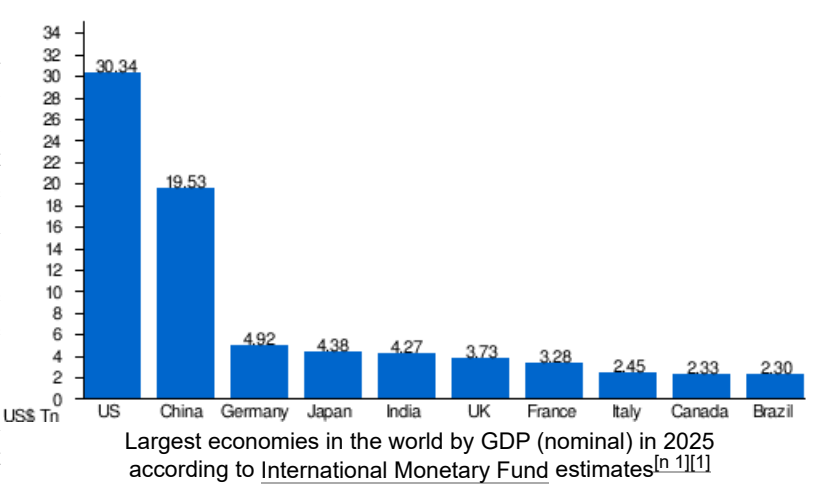

The rankings of national economies over time have changed considerably; the economy of the United States surpassed the British Empire's output around 1916,^[6] which in turn had surpassed the economy of the Qing dynasty in aggregate output decades earlier.^{[7][8]} Since China's transition to a socialist market economy through controlled privatisation and deregulation,^{[9][10]} the country has seen its ranking increase from ninth in 1978, to second in 2010; China's economic growth accelerated during this period and its share of global nominal GDP surged from 2% in 1980 to 18% in 2021.^{[8][1][11]} Among others, India has also experienced an economic boom since the implementation of economic liberalisation in the early 1990s.^[12]

The first list includes estimates compiled by the International Monetary Fund's World Economic Outlook, the second list shows the World Bank's data, and the third list includes data compiled by the United Nations Statistics Division. The IMF's definitive data for the past year and estimates for the current year are published twice a year in April and October. Non-sovereign entities (the world, continents, and some dependent territories) and states with limited international recognition (such as Kosovo and Taiwan) are included in the list where they appear in the sources.

Notes

- Figures for China exclude Taiwan, and the [special administrative regions](#) of Hong Kong and Macau.
- Based on the best available GDP figure for each country at the time of creation (16 June 2024). Best available GDP figure was defined as the latest available figure from the [International Monetary Fund](#) (including forecasts for the current year), otherwise the latest available figure from the [World Bank](#), otherwise the latest available figure from the [United Nations Statistics Division](#); however, countries that didn't have any figure for a year more recent than 2019 were not included at all. For almost all countries, the latest IMF forecast figure for 2024 was used.
- Figures exclude the special administrative regions of [Hong Kong](#) and [Macau](#).
- The name used in the IMF report is "Taiwan Province of China".
- The name used in the IMF report is "Hong Kong SAR".
- Figures exclude the [Autonomous Republic of Crimea](#) and [Sevastopol](#).
- The UN figure excludes the autonomous region of [Zanzibar](#).
- The name used in the IMF report is "Macao SAR".
- Data are for the area controlled by the Government of the Republic of Cyprus.
- Excludes [Abkhazia](#) and [South Ossetia](#)
- The name used in the IMF and World Bank reports is "West Bank and Gaza".
- The name used by the UN is "State of Palestine".
- Excludes data for [Transnistria](#)
